Revision Number	Revision Date	Summary of Changes	Author(s)
0.1	09/05/2015	We filled out the initial projects plan with our basic information/understanding of the project.	Everyone in group
0.2	10/3/2015	Brief updates	Raasin

Brief problem statement

We seek to provide a mechanism that manages employees, gathers statistical data, registers patients, setting up appointments, and allowing the transfer of patients and their information between hospitals on the system. We want our user interface to be easy to interact with and navigate through. Registration should be a minimal process that does not cause the user any stress.
